

VISHNU VARDHAN

AI/ML Engineer | Full Stack Developer | Web & Application Development

+91-7993657901 | vishnu81438@gmail.com | [LinkedIn](#) | [GitHub](#) | India

PROFESSIONAL SUMMARY

Aspiring AI/ML Engineer with strong knowledge in Python, Machine Learning, Deep Learning, and Data Processing. Hands-on experience in developing web applications, integrating frontend and backend systems, and building AI-based projects using NLP and Deep Learning techniques. Quick learner with strong problem-solving skills, passionate about building intelligent and scalable solutions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

Frontend Technologies: HTML5, CSS, JavaScript (ES6+)

Backend / Frameworks: Python (Django/scripting), REST API Integration

Database: MySQL, DBMS

Core Concepts: Object-Oriented Programming (OOP), File and Exception Handlings, SDLC

AI / Machine Learning: Fundamentals of Machine Learning and AI, Deep Learning Basics, Natural Language Processing (NLP), Data Processing & Preprocessing, Model Training & Optimization

Development Tools: Git, GitHub, VS Code, Microsoft Office

INTERNSHIP

Application Developer Intern | Roman Technologies, Bangalore, India | *May 2025 – July 2025*

- Developed and optimized responsive web and mobile application components using HTML, CSS, JavaScript, and Python, improving UI performance across devices.
- Integrated frontend and backend systems, performing debugging, unit testing, and performance tuning to enhance application reliability.
- Collaborated in an agile development environment following SDLC best practices and Git-based version control workflows.
- Participated in code reviews and contributed to documentation for maintainability and knowledge transfer.

PROJECTS

Online Recruitment Fraud Detection | *Deep Learning, NLP, Python*

- Designed and trained a deep learning model to classify fraudulent job postings with high precision, addressing a critical real-world problem in online hiring.
- Applied NLP techniques including text tokenization, feature extraction, and vectorization to analyze and classify job description.
- Improved model accuracy through systematic data preprocessing, hyperparameter tuning, and optimization techniques.

ATM Banking System | *Python, OOP, Encapsulation*

- Built a secure ATM simulation using Python OOP principles, applying encapsulation to protect sensitive data such as PIN and account balance.
- Implemented PIN-based authentication with automatic account lockout after multiple failed attempts, enhancing system security.
- Developed core banking features including balance inquiry, deposit, cash withdrawal, and PIN change with input validation.

EDUCATION

B. Tech – Computer Science & Engineering

2023 – 2026

Dr. K.V. Subba Reddy Institute of Technology, Kurnool

Diploma – Civil Engineering

2020 – 2023

M.J.R Institute of Technology, Piler

Secondary School (10th Grade)

2020

A.P. Model School

SOFT SKILLS

Problem Solving • Communication • Adaptability • Time Management • Team Collaboration • Quick learner

LANGUAGES

English (Professional) • **Telugu** (Native) • **Hindi** (Conversational)
